Duchenne Muscular Dystrophy: Current Understanding and Treatment

Build your knowledge with first-of-its kind instruction from an expert in Duchenne muscular dystrophy care at your own pace

The Course Objectives

By the end of the course, the participant will be able to:

- Correctly identify the 4 main medical tests which lead to a diagnosis of Duchenne muscular dystrophy.
- Correctly identify the most common type of genetic mutation which leads to Duchenne.
- Given a patient scenario, correctly identify the current stage of Duchenne the patient is experiencing.
- Correctly identify 3 body systems affected by Duchenne.
- Given a patient scenario which identifies the stage of the disease, correctly choose 2 appropriate treatment interventions.
- Demonstrate correct understanding regarding appropriate exercise prescription for individuals with Duchenne by answering correctly on the related questions of the post-course exam.
- Correctly list 4 other healthcare professionals whose expertise is part of the standard of care for patients with Duchenne.

About the Presenter

Jennifer Wallace Valdes draws from experience since 2002 in pediatrics and with an emphasis in the muscular dystrophy population. She has been invited to present current treatment topics and advances at Duchenne conferences and has taught continuing education to healthcare professionals since 2009. She is the owner of Duchenne Therapy Network and provides evaluation, treatment and consultations for those with Duchenne and Becker muscular dystrophy.
